

Corporate Ethics International

(Portland, OR)

Corporate Initiative Project

Total Award: \$140,000 over 1 year

To support the Corporate Initiative Project, a project of Corporate Ethics International (CEI), to design and lay the foundation for a long-term strategic initiative to fundamentally change the governance, accountability, and behavior of corporations. The project aims to advance a vision of environmental and social sustainability with a focus on the role of the ethical corporate structure of the future. CEI will produce a framework for advancement, and a roadmap that outlines the initiative's specific tracks, campaigns and strategies, along with their sequencing and inter-connections. The project will also identify and lay the foundation for creating an overarching body to guide and coordinate this initiative over the long-term. To achieve these results, the project will engage leading theorists and activists, convene working summits, facilitate summit follow ups, and produce a final comprehensive report laying out the plan for the strategic initiative.

Program Contribution Breakdown:

\$120,000 Environment/Contemplative Practice: *Goal I, Objective I, Strategies 1 & 2*

\$20,000 Interprogram Initiatives for Social and Economic Justice: *Objectives I & II*
